Author/Title Index

(Volume 18)

Adams, Raymond J., See Wilson, Mark

Allen, Nancy L., See Donoghue, John R.

Boik, Robert J., *The Analysis of Two-Factor Interactions in Fixed Effects Linear Models,* No. 1, p. 1

Bosker, Roel J., See Snijders, Tom A. B.

Braun, Henry I., & Zwick, Rebecca, *Empirical Bayes Analysis of Families of Survival Curves: Applications to the Analysis of Degree Attainment,* No. 4, p. 285

Carriere, Keumhee Chough, See Keselman, H. J.

Cozad, James B., See Mueller, Ralph O.

Davis, John M., See Gibbons, Robert D.

Donoghue, John R., & Allen, Nancy L., *Thin Versus Thick Matching in the Mantel-Haenszel Procedure for Detecting DIF,* No. 2, p. 131

Gibbons, Robert D., Hedeker, Donald R., & Davis, John M., *Estimation of Effect Size From a Series of Experiments Involving Paired Comparisons,* No. 3, p. 271

Hedeker, Donald R., See Gibbons, Robert D.

Keselman, H. J., Carriere, Keumhee Chough, & Lix, Lisa M., *Testing Repeated Measures Hypotheses When Covariance Matrices Are Heterogeneous,* No. 4, p. 305

Lix, Lisa M., See Keselman, H. J.

Marcoulides, George A., *Maximizing Power in Generalizability Studies Under Budget Constraints,* No. 2, p. 197

Mueller, Ralph O., & Cozad, James B., *Standardized Discriminant Coefficients: A Rejoinder,* No. 1, p. 108

Nandakumar, Ratna, & Stout, William, *Refinements of Stout's Procedure for Assessing Latent Trait Unidimensionality,* No. 1, p. 41

Raudenbush, Stephen W., *A Crossed Random Effects Model for Unbalanced Data With Applications in Cross-Sectional and Longitudinal Research,* No. 4, p. 321

Seltzer, Michael H., *Sensitivity Analysis for Fixed Effects in the Hierarchical Model: A Gibbs Sampling Approach,* No. 3, p. 207

Singer, Judith D., & Willett, John B., *It's About Time: Using Discrete-Time Survival Analysis to Study Duration and the Timing of Events,* No. 2, p. 155

Snijders, Tom A. B., & Bosker, Roel J., *Standard Errors and Sample Sizes for Two-Level Research,* No. 3, p. 237

Stout, William, See Nandakumar, Ratna

Viana, Marlos A. G., *On a Criterion for Combining Correlational Data,* No. 3, p. 261

Willett, John B., See Singer, Judith D.

Wilson, Mark, & Adams, Raymond J., *Marginal Maximum Likelihood Estimation for the Ordered Partition Model,* No. 1, p. 69

Zwick, Rebecca, See Braun, Henry I.

Zwick, Rebecca, *The Validity of the GMAT for the Prediction of Grades in Doctoral Study in Business and Management: An Empirical Bayes Approach,* No. 1, p. 91

Key Word Index

(Volume 18)

Admissions tests 1:91
Approximate degrees of freedom solution 4:305

Combining studies 3:261
Covariance heterogeneity 4:305
Covariance components 4:321

Differential item functioning 2:131
DIMTEST 1:41

Effect size 3:271
Empirical Bayes 4:285
Empirical Bayes regression 1:91
Essential independence 1:41
Essential unidimensionality 1:41
Event history analysis 2:155, 4:285

Generalizability theory 2:197
Gibbs sampling 3:207
GMAT 1:91

Hierarchical linear model 3:237
Hierarchical models 3:207, 4:321

Item bias 2:131

Longitudinal data 2:155

Mantel-Haenszel 2:131
Marginal maximum likelihood 1:69
Maximum likelihood 4:321
Measurement error 2:197
Meta-analysis 3:271
Multilevel research 3:237
Multiple comparisons 1:1

Ordered partition model 1:69

Paired comparison 3:271
Partial credit model 1:69
Power 2:197
Product contrasts 1:1

Repeated measures designs 4:305

Sample design 3:237
Sensitivity analysis 3:207
Signal-to-noise ratio 3:261
Simultaneous inference 1:1
Survival analysis 2:155, 4:285

Unidimensionality 1:41

Validity 1:91
